

## NEW 200 PSI DROP HOSE

**S**nyder's latest advancement in fuel dispensing equipment.

As a result of Snyder's ongoing research and development, the new 200 psi drop hoses incorporate the following features:

- ✓ Improved ergonomic benefits thanks to a 30% reduction in hose weight, greater flexibility, and a shorter bend radius of 5" compared to 13" for 300 psi hose.
- ✓ Tested as a complete assembly to ensure maximum performance.
- ✓ Crimped-on ends add another layer of resistance to high pressure. Snyder 200 psi hoses are engineered and manufactured for a 4:1 safety factor.
- ✓ Excellent environmental resistance. The outer hose surface is resistant to abrasion, oil, weathering, sunlight/UV/ozone exposure, and extreme temperatures.
- ✓ Multi-fuel liner is resistant to diesel, biodiesel (to B100), gasoline, and ethanol.
- ✓ A flanged upper connection is available to eliminate the upper Kamlock connection.
- ✓ Each hose assembly is assigned a specific serial number to ensure traceability.

# DROP HOSES NEW OR REQUALIFIED

## HOW TO ORDER

Specify new (FCNDH) or requalified (FCRDH).  
 Remaining numbers are X-Y-ZZZ  
 X: Crane type • Y: End Connections  
 ZZZ: Length of drop hose assembly.

Length is measured from the end of the overall drop hose assembly - Kamlock to Kamlock or Kamlock to Flange.

Standard part numbers are shown below.  
 Custom drop hose assemblies are available upon request.
